# BLUEBERRY SERIES

Discover the **Blueberry** Bamaplast series and transform the cultivation of your blueberries! Imagine having full control over the water needs of your plants in every season and location. Thanks to the **Blueberry** pots, this is possible. The excellent drainage, ensured by the pots for the root system, prevents harmful water stagnation and inhibits the spread of pathogens from plant to plant, thus maximizing production. The advanced internal ventilation, thanks to the innovative bottom specially designed for this cultivation, ensures the right oxygenation of the roots and prevents water excesses. The bottom of the pot is raised from the ground, allowing the plant to breathe and facilitating drainage thanks to numerous drainage holes. With the **Blueberry** Bamaplast series, you have everything you need for your blueberries to flourish like never before.

# SQUARE SERIES

Explore the **Square** series: a smart choice to promote vigorous plant growth! With our **Square** pots, you'll have total control over plant growth, thanks to unique features that make them ideal for any need. All pots allow for **44%** more surface utilization compared to round pots of the same capacity. The special anti-spiraling system will guide the roots downward, preventing them from coiling and ensuring rapid growth and replication.

# HIGH NURSERY SERIES

Maximize your plant's productivity with our **High Nursery** series, designed specifically for fruit plants with taproots that require strong and healthy roots. Made of polyethylene, this pot is built to last, especially in outdoor nursery cultivations.

Choose the quality and reliability of the **High Nursery** pot to achieve the best results for your fruit plants!

## 40/AM TUB

Discover the 30-liter polyethylene Nursery Tub 40/AM, ideal for cultivating fruit plants! With ergonomic handles for a secure and comfortable grip, this tub is the perfect solution for your cultivation needs. The raised bottom allows the plant to breathe, facilitating drainage with numerous drainage holes and ensuring vigorous plant growth. Thanks to advanced ventilation compared to its predecessor, the roots receive the right oxygenation, avoiding water stress and protecting the plant from the formation of unwanted diseases. Resilient and durable, it offers reliable protection even in the most extreme weather conditions.

Choose the Nursery Tub 40/AM and achieve extraordinary results in your outdoor cultivation!"
